

Rainfall Forecast 10-17 Dec 2025

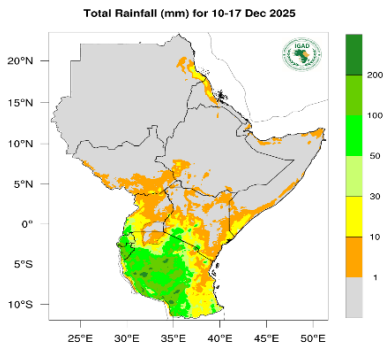

Figure 1 - Total rainfall forecast 10-17 Dec 2025 (Source: ICPAC).

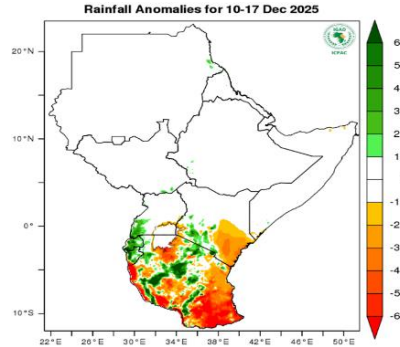

Figure 2 - Rainfall anomalies forecast 10-17 Dec 2025 (Source: ICPAC).

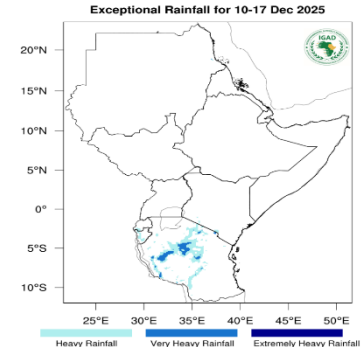

Figure 3 - Exceptional Rainfall forecast 10-17 Dec 2025 (Source: ICPAC).

Figure 1 above indicates that light rainfall (less than 10 mm, colored orange) is expected over parts of the southern regions of South Sudan, mostly in the southern parts of Jonglei and Pibor, as well as greater Equatoria. The rest of the country remains dry, indicating the dry season has started. Figure 3 above indicates no exceptional rainfall (colored cyan) expected over South Sudan this week.

In terms of rainfall anomalies (Figure 2), normal conditions (colored cyan) are expected over South Sudan.

Temperature Forecast for 10-17 Dec 2025

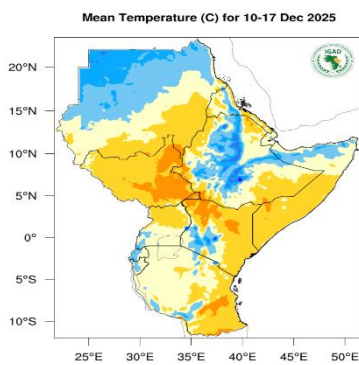

Figure 4 – Mean temperature forecast For 10-17 Dec 2025 (Source: ICPAC).

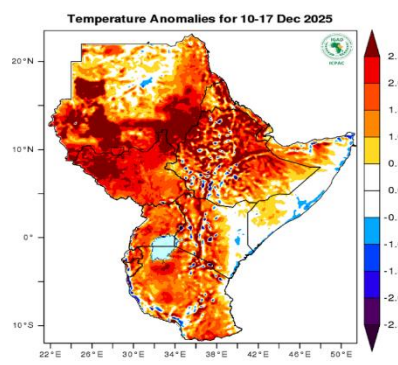

Figure 5 - Temperature Anomalies For 10-17 Dec 2025 (Source: ICPAC).

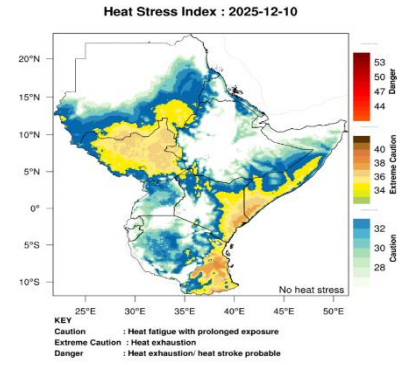

Figure 6 - Heat Stress Index: 2025-12-10 10-17 Dec 2025 (Source: ICPAC).

Figure 4 above indicates moderate temperatures (24 - 32 °C-colored orange) are expected over South Sudan. Figure 6 above indicates elevated levels of heat stress expected in South Sudan.

According to temperature anomalies (Figure 5), warmer-than-usual temperatures (colored brown) are expected over South Sudan.
