

Rainfall Forecast 25 Feb-04 March 2026

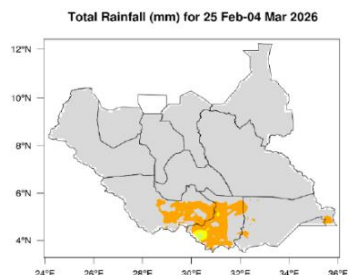

Figure 1 - Total rainfall forecast 25 Feb-04 Mar 26 (Source: SSMS).

Figure 2 - Rainfall anomalies forecast 25 Feb-04 Mar 26 (Source: SSMS).

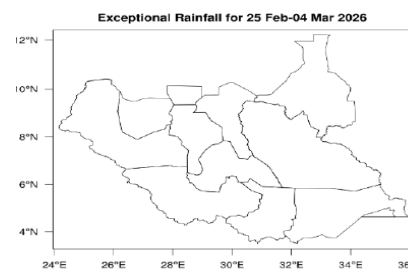

Figure 3 - Exceptional Rainfall forecast 25 Feb-04 Mar 26 (Source: SSMS).

Figure 1 above indicates light rainfall (colored orange) is expected in the western and Central Equatoria states and the southeastern part of Eastern Equatoria state. Figure 3 above indicates that no exceptional or heavy rainfall is expected during this week.

In terms of rainfall anomalies (Figure 2), dry conditions are expected in South Sudan.

Temperature Forecast for 24 Feb-04 March 2026

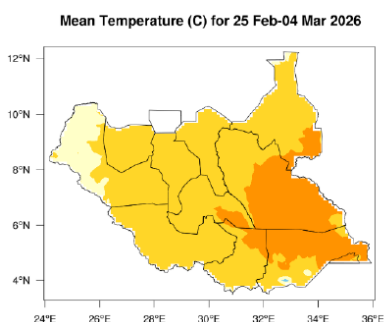

Figure 4 - Mean temperature forecast 25 Feb-04 Mar 26 (Source: SSMS).

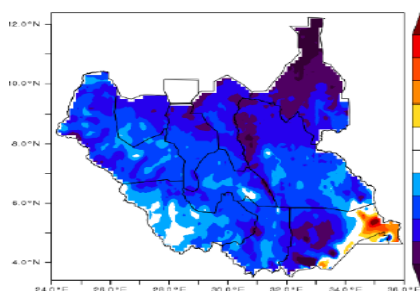

Figure 5 - Temperature Anomalies 25 Feb-04 Mar 26 (Source: SSMS).

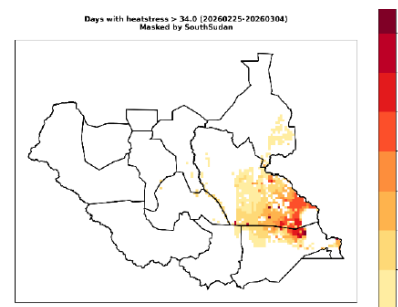

Figure 6 - Heat Stress Index 25 Feb-04 Mar 26 (Source: SSMS).

Figure 4 above (5 Feb - 04 March 2026) indicates that average temperatures are above 28 °C, with actual daily maximums above 32 °C on all days, especially in the northern parts of central & eastern Equatoria, Pibor Administration Area, most parts of Jonglei state, Lake state and Southeastern parts of Upper Nile State. Figure 6 above indicates that most parts of the Pibor Administration Area are expected to experience elevated heat stress with more than 34°C, for a period of up to 4-7 days from 25 Feb to 04 March 2026.

According to temperature anomalies (Figure 5), cooler-than-usual temperatures are expected over South Sudan this week.
