

**Rainfall Forecast 30 Sept-07 Oct 2025**

**Figure 1 - Total rainfall forecast 30 Sept-07 Oct 2025 (Source: ICPAC).**

**Figure 2 - Rainfall anomalies forecast 30 Sept-07 Oct 2025 (Source: ICPAC).**

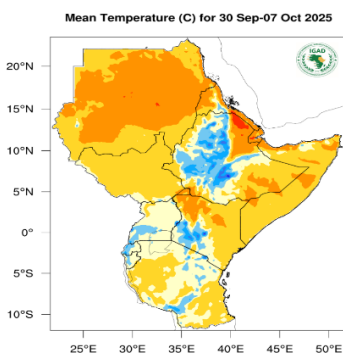

**Figure 3 - Exceptional rainfall for 30 Sept-07 Oct 2025 (Source: ICPAC).**

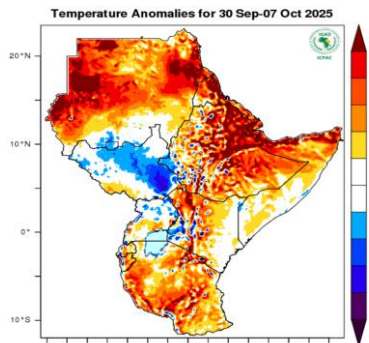

Figure 1 above indicates heavy rainfall (above 200 mm-colored dark green) expected over central to northern South Sudan, such as Lakes, most of Warrap state, most of Northern Bahr-el Ghazal state, Wau and Jur River counties, while moderate rainfall (50-200mm-colored green) is expected in most parts of South Sudan. Light rainfall (less than 50 mm - colored orange) is expected in the eastern parts of Eastern Equatoria, such as Kapoeta South and East. Figure 3 above indicates heavy rainfall (colored blue) exceeding the 90 percentile (the highest 10 percent on record) expected over areas in central to northern South Sudan, western Ethiopia, and central to northern Uganda. This will increase the likelihood of flooding incidents over already flood-affected and flood-prone areas in the central to north-central parts of South Sudan.

In terms of rainfall anomalies (Figure 2), more than usual rainfall (colored green) is expected over most parts of South Sudan, while less than usual rainfall (colored orange) is expected over areas of Yambio in Western Equatoria State, South Sudan.

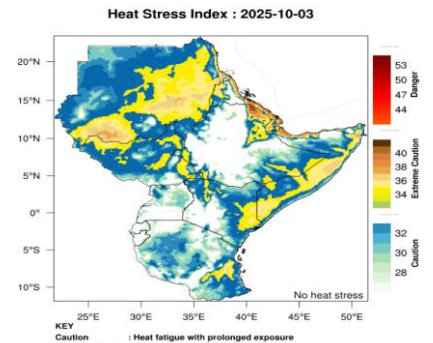

**Temperature Forecast for 30 Sept-07 Oct 2025**

**Figure 4 - Mean temperature forecast for 30 Sept-07 Oct 2025 (Source: ICPAC).**

**Figure 5 - Temperature Anomalies for 30 Sept-07 Oct 2025 (Source: ICPAC).**

**Figure 6 - Heat Stress Index: 2025-10-03 30 Sept-07 Oct 2025 (Source: ICPAC).**

Figure 4 above indicates moderate temperatures (20 - 32 °C-colored orange) expected over South Sudan. Figure 6 above indicates that no elevated levels of heat stress are expected in South Sudan.

According to temperature anomalies (Figure 5), cooler-than-usual temperatures (colored blue) are expected over eastern and northern regions of South Sudan, while warmer conditions (colored orange and cyan) are expected over the rest of the country.
